SUMMARY

I am a forward-thinking *Security Engineer* with a strong commitment to delivering innovative cloud-based solutions that cater to customer needs and contribute to a better world. My problem-solving approach is fueled by a people-centric mindset, collaboration, scientific methodology, and critical thinking. My foundation in teamwork, adaptability, and coachability was established during my seven-year tenure as a Soldier in the US Army.

KEY QUALIFICATIONS

Security Automation	Incident Response	SIEM Analysis
Azure AD	Emergency Communications	Threat Hunting
Vulnerability Management	Security Operations	C#   .NET Core

PROFESSIONAL EXPERIENCE

NFP - Remote

January 2023-Present

**Title:** Cybersecurity Analyst

Member of a 5-person Cybersecurity team responsible for securing the IT infrastructure for more than 9,000 users.

- Automated travel requests through ServiceNow and Azure Logic Apps resulting in over 140 personnel hours saved annually with consumption costs of only \$50/monthly.
- Worked alongside the Chief Information Security Officer (CISO) to develop an emergency communications plan, created supporting documentation/training aids, and coordinated company-wide test runs to confirm procedures resulting in 100% preparation of company for fallback communication.
- Develop internal Cybersecurity team procedures using Azure DevOps and by adapting Agile Methodology to design a project backlog for security baseline hardening.
- Prepared bids for budget while engaging external security vendors to close identified gaps/weaknesses in our security tooling.
- Work alongside the CISO/Director of Cybersecurity as well as Development/Vulnerability Management team to formalize Vulnerability management processes and procedure.
- Perform Incident Response (IR) for identity and endpoint alerts.

Azure Logic Apps	Security Operations	Incident Response
Power Automate	SIEM Log Analysis	Endpoint Analysis
Project Management	Advanced Hunting	Communication
ServiceNow	Performance Analytics	Agile Methodology
